Category Breakdown

Risk scores and rule counts across each assessment category, with the maximum severity level encountered in each.

Category	Weight	Score	Score	Triggered	Max Risk
Residency	30%		92	2	HIGH
Tax	30%		78	2	HIGH
Cross-Border	25%		55	1	MEDIUM
Structure	15%		30	1	LOW

Jurisdiction Breakdown

Jurisdiction		Score	Score	Triggered
AU	Australia		88	3
HK	Hong Kong		30	1
SG	Singapore		50	1
UAE	United Arab Emirates		25	1

How the score is calculated

Each triggered rule is scored using its risk weight (Low=1, Medium=2, High=3) and confidence weight (Low=0.6, Medium=0.8, High=1.0). The category score is the average of all triggered rule scores in that category. The overall composite score is a weighted average: Residency 30%, Tax 30%, Cross-Border 25%, Structure 15%. The overall risk level is always the maximum severity across all triggered rules.

Triggered Rules

5 rules triggered by the facts provided. Each finding includes the legislative basis, risk severity, and confidence assessment.

AU-RES-01	AU	HIGH	RESIDENCY
Client meets the 183-day physical presence test under the Australian residency rules and is therefore an Australian tax resident for the relevant year.			
s 6(1) – definition of resident Score: 3.0 Confidence: high			
Income Tax Assessment Act 1936 (Cth)			
AU-TAX-04	AU	HIGH	TAX
Worldwide income is assessable in Australia when the client is an Australian tax resident.			
s 6-5(2) Score: 3.0 Confidence: high			
ITAA 1997			

SG-RES-02

SG

MEDIUM

RESIDENCY

Client is physically present in Singapore for more than 60 days, triggering short-term resident treatment.

[s 2\(1\)](#) Score: 1.6 Confidence: medium

Income Tax Act 1947 (Singapore)

HK-STR-03

HK

LOW

STRUCTURE

Hong Kong holding company structure with standard 16.5% profits tax.

[s 14\(1\)](#) Score: 1.0 Confidence: high

Inland Revenue Ordinance

UAE-TAX-01

UAE

LOW
